Listing of Claims

- 1. (Previously Presented) A method for treating or ameliorating a condition selected from:
- (a) hepatic or cardiac or brain ischemia-reperfusion injury;
- (b) pulmonary hypertension; or
- (c) cerebral artery vasospasm,

in a subject by decreasing blood pressure and/or increasing vasodilation in the subject, the method comprising administering non-acidified sodium nitrite to the subject to decrease the blood pressure and/or increase vasodilation in the subject, thereby treating or ameliorating the condition.

- (Original) The method of claim 1, which is a method for treating or ameliorating hepatic or cardiac or brain ischemia-reperfusion injury.
- $3. \, (Original) \quad The \, method \, of \, claim \, 2, \, wherein \, administering \, sodium \, nitrite \, to \, the \, subject \, is \, intravenous.$
- 4. (Previously Presented) The method of claim 2, wherein the sodium nitrite is administered to a circulating concentration of about 0.6 to 240 μ M.
- 5. (Withdrawn) The method of claim 1, which is a method for treating or ameliorating pulmonary hypertension.
- 6. (Withdrawn) The method of claim 5, wherein the pulmonary hypertension is neonatal pulmonary hypertension.
- 7. (Withdrawn) The method of claim 5, wherein administering sodium nitrite to the subject is by inhalation.
 - 8. (Withdrawn) The method of claim 7, wherein the sodium nitrite is nebulized.

- 9. (Withdrawn) The method of claim 5, wherein the sodium nitrite is administered at a rate of 270 µmol/minute.
- 10. (Withdrawn) The method of claim 1, which is a method for treating or ameliorating cerebral artery vasospasm.
- 11. (Withdrawn) The method of claim 10, wherein administering sodium nitrite to the subject is intravenous.
- 12. (Withdrawn) The method of claim 10, wherein the sodium nitrite is administered at a rate of about 45 to 60 mg/kg.
- 13. (Previously Presented) The method of claim 1, wherein the sodium nitrite is administered in combination with at least one additional agent.
 - 14. (Previously Presented) The method of claim 1, wherein the subject is a mammal.
- 15. (Currently Amended) The method of any one of elaimsclaim 14, wherein the subject is a human.
- 16. (New) The method of claim 1, wherein the non-acidified sodium nitrite is administered to the subject in an amount and for a sufficient period of time to reach a circulating concentration in blood of the subject of less than about 25 µM, thereby treating or ameliorating the condition.
